Professional Summary

Data Science Analyst with 2+ years of experience in data analysis, machine learning, and business intelligence across consulting and software environments. Skilled in Python, SQL, Pandas, Scikit-learn, and Power BI, with demonstrated success in improving data accuracy to 99.9%, cutting query times by 20%, and building predictive models for stock and sales analytics. Actively seeking Data Analyst or Data Scientist roles in India (Mumbai, Bangalore, Gurugram, or Remote) to deliver high-impact, data-driven solutions.

Experience

Samatrix Consulting Private Limited

Sept 2024 - Present

Data Science Analyst

Indore, M.P

- Interpreted datasets to extract insights that led to a 15% improvement in data-driven decision-making across key business areas.
- Standardized data cleaning procedures using Python and Pandas, leading to 99.9% accuracy in data preprocessing outputs.
- Queried and examined over 100K records weekly using SQL and Python, cutting retrieval time by 20%.
- Audited data quality on data sources, identifying and resolving 95% of data discrepancies to maintain high data integrity.

Antardrishti Foundation

Oct 2022 - Apr 2024

Software Development Engineer

Indore, M.P

- Directed a team of three in developing responsive websites, increasing user engagement by 20%.
- Instituted automated code validation and CI pipelines, cutting bugs by 25% and reducing deployment times.
- Boosted system efficiency by cutting load times by 25% using advanced programming techniques in C++ and Python.
- Configured front-end and back-end systems with HTML, CSS, and Linux.

TCS iON

Jun 2022 - Sept 2022

Software Development Intern

Indore, M.P

- Engineered blockchain application solutions with Python and Solidity, improving code efficiency by 30%
- Orchestrated Docker deployments on AWS, improving transaction speed by 15%.
- Configured Linux-based environments to support scalable, fault-tolerant applications and improving deployment efficiency by approximately 30%.

Technical Skills

- **Programming Languages:** Python, C++, Java, R Programming
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Excel, Jupyter Notebook
- **Statistics & Analytics:** Descriptive Statistics, Hypothesis Testing, Regression Analysis, Probability

- **Cloud Platforms:** AWS (EC2, S3), Microsoft Azure
- **Machine Learning & Modelling:** Scikit-learn, TensorFlow (Basics), Regression, Classification, Feature Engineering, Predictive Modelling, Time Series Analysis
- **Databases:** MySQL, NoSQL, SQL Querying
- **Tools & Platforms:** Git, GitHub, Docker, Visual Studio Code, Jupyter Notebook
- **Other:** ETL, Data Wrangling, Data Cleaning, Data Structures, Algorithms, Agile Methodologies, Stakeholder Management, Technical Communication, Problem Solving

Certifications

Google Data Analytics Professional Certificate | [Link](#)

Nov 2024

- Comprehensive program covering data cleaning, analysis, and visualization techniques.
- Gained proficiency in tools such as Google Sheets, SQL, Tableau and R for analysing and visualizing data.
- Enhancing knowledge of data-driven decision-making and effective communication of insights.

Projects

Sales Analysis Dashboard | *Power BI, Excel, JSON*

<https://github.com/RDrahul123/Sales-Dashboard.git>

- Developed an interactive Power BI dashboard analysing 12 months of sales data, improving visibility into performance trends.
- Created over 5 interactive reports to show changes in sales and provide clear information on profits.
- Mapped regional profits across 50 zones, identifying optimization opportunities, that boosted profitability and efficiency.
- Segmented product data into 15+ subcategories to isolate high-margin contributors.

Financial Market Trend Predictor | *Python-based Stock and Cryptocurrency Analysis Tool*

<https://github.com/RDrahul123/The-Stock.git>

- Constructed a Python-based analytics engine that evaluated stock and cryptocurrency trends, achieving a 15% increase in predictive accuracy through machine learning models.
- Devised interactive visual dashboards and notebooks using Matplotlib, Pandas, and NumPy, enabling real-time insights into technical indicators and market behaviours.
- Refactored data pipelines and model workflows to reduce processing latency by 30%, enhancing overall system responsiveness and user experience.

Education

Acropolis Institute of Technology and Research

B. Tech in Computer Science

2018 – 2022

CGPA: 8.2

Vidyasagar School

Science (Mathematics, Physics, Chemistry, Computer science)

2017 – 2018

Percentage: 78.0
