PROFESSIONAL SUMMARY

Data Science Analyst with 3+ years across software engineering and analytics. Experienced in Python, Pandas, SQL, Power BI and Scikit-learn for data cleaning, dashboards, time series forecasting and predictive modelling. Built and deployed ML web applications with FastAPI and comfortable moving from raw data to reporting that supports business decisions.

EXPERIENCE

Samatrix Consulting Private Limited

Data Science Analyst

Sept 2024 – Present

Indore, M.P.

- Analyzed business datasets and presented findings that improved data-driven decision-making by 15% across key business areas.
- Standardized data cleaning workflows in Python and Pandas, achieving 99.9% accuracy in preprocessing outputs.
- Audited data sources for quality issues and resolved 95% of identified discrepancies to maintain data integrity.

Antardrishti Foundation

Software Development Engineer

Oct 2022 – Apr 2024

Indore, M.P.

- Led a team of three developers building responsive websites, increasing user engagement by 20%.
- Automated code validation and CI pipelines, cutting bugs by 25% and shortening deployment times.
- Reduced page load times by 25% through code-level performance optimization.

TCS ION

Software Development Intern

Jun 2022 – Sept 2022

Indore, M.P.

- Built blockchain application components in Python and Solidity, improving code efficiency by 30%.
- Deployed Docker containers on AWS, improving transaction speed by 15%.
- Configured Linux environments for scalable, fault-tolerant applications, improving deployment efficiency by about 30%.

PROJECTS

Sales Analysis Dashboard | Power BI, DAX, Excel, JSON github.com/RDrahul123/Sales-Dashboard

- Built a 12-month Power BI suite with 5+ interactive reports covering profit margins across 50 zones and 15+ product subcategories.
- Surfaced low-margin zones and subcategories to guide pricing and profitability decisions.

Sales Forecasting System | Python, SARIMA, LightGBM, LSTM, FastAPI github.com/RDrahul123/Sales-Forecasting

- Built an end-to-end forecasting pipeline on the Rossmann retail dataset, comparing SARIMA, LightGBM and LSTM models.
- Served forecasts through a FastAPI web app for interactive use.

Sentiment Analysis Studio | Python, FastAPI, Scikit-learn github.com/RDrahul123/Sentiment-Analysis

- Built a FastAPI web app running Logistic Regression, SVM and Naive Bayes in parallel for single and batch text classification.
- Added confidence scoring, confusion matrices and CSV export.

TECHNICAL SKILLS

Languages: Python, SQL, R, C++, Java

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI (DAX), Tableau, Excel

Statistics: Descriptive Statistics, Hypothesis Testing, A/B Testing, Regression Analysis, Probability

Machine Learning: Scikit-learn, TensorFlow, Feature Engineering, Predictive Modelling, Time Series Forecasting

Web & APIs: FastAPI, REST APIs

Databases: MySQL, NoSQL

Cloud & DevOps: AWS, Microsoft Azure, Docker, Linux, Git, GitHub

Other: ETL, Data Wrangling, Data Pipelines, Business Intelligence, Agile

CERTIFICATIONS

Google Data Analytics Professional Certificate | Coursera | Nov 2024 [Verify](#)

- Covered data cleaning, analysis and visualization using Google Sheets, SQL, Tableau and R.

EDUCATION

Acropolis Institute of Technology and Research

B.Tech in Computer Science | CGPA: 8.2

2018 – 2022
