

PROFESSIONAL SUMMARY

Data Scientist with experience across predictive modeling, machine learning, and business analytics. Proficient in Python, SQL, Pandas, Scikit-learn, and TensorFlow, with hands-on experience in exploratory data analysis (EDA), feature engineering, statistical modeling, and time-series forecasting. Applies natural language processing and large language model techniques to unstructured data and delivers production-ready models through FastAPI.

PROFESSIONAL EXPERIENCE

Samatrix Consulting Private Limited | September 2024–Present

Data Science Analyst | Indore, Madhya Pradesh

- Performed exploratory data analysis (EDA) using Python, Pandas, and SQL to identify business trends and deliver insights that improved data-driven decision-making by 15% across key business areas.
- Applied natural language processing (NLP) and large language model (LLM) techniques to unstructured text data to support text classification and information extraction.
- Prototyped retrieval-augmented generation (RAG) workflows using embeddings and vector search to surface relevant context from document collections.
- Standardized data-cleaning workflows using Python and Pandas, achieving 99.9% accuracy in preprocessing outputs.
- Audited data sources and resolved 95% of identified discrepancies, strengthening data quality and integrity.

Antardrishti Foundation | October 2022–April 2024

Software Development Engineer | Indore, Madhya Pradesh

- Directed a team of 3 developers in building responsive websites, increasing user engagement by 20%.
- Automated code validation and continuous integration pipelines, reducing bugs by 25% and shortening deployment times.
- Optimized application performance through code-level improvements, reducing page load times by 25%.

TCS iON | June 2022–September 2022

Software Development Intern | Indore, Madhya Pradesh

- Developed distributed-ledger application components using Python and Solidity, improving code efficiency by 30%.
- Containerized applications with Docker and deployed them on AWS, increasing transaction speed by 15%.
- Configured Linux environments for scalable, fault-tolerant applications, improving deployment efficiency by approximately 30%.

PROJECTS

Sales Forecasting System | Python, SARIMA, LightGBM, LSTM, FastAPI | [github.com/RDrahul123/Sales-Forecasting](#)

- Engineered an end-to-end forecasting pipeline using the Rossmann retail dataset and evaluated 3 models: SARIMA, LightGBM, and LSTM.
- Deployed forecasts through an interactive FastAPI web application.

Sentiment Analysis Studio | Python, FastAPI, Scikit-learn | [github.com/RDrahul123/Sentiment-Analysis](#)

- Implemented a FastAPI application running Logistic Regression, SVM, and Naive Bayes models for single-text and batch classification.
- Integrated confidence scores, confusion matrices, and CSV export to support model review and results analysis.

Sales Analysis Dashboard | Power BI, DAX, Excel, JSON | [github.com/RDrahul123/Sales-Dashboard](#)

- Designed a 12-month Power BI dashboard suite with 5+ interactive reports covering profit margins across 50 zones and 15+ product subcategories.
- Identified low-margin zones and subcategories to support pricing and profitability decisions.

TECHNICAL SKILLS

Programming: Python, SQL, R, C++, Java

Machine Learning: Scikit-learn, TensorFlow, PyTorch, SARIMA, LightGBM, LSTM, Classification, Regression, Feature Engineering, Predictive Modeling, Time-Series Forecasting, Model Evaluation

Statistics: Descriptive Statistics, Hypothesis Testing, A/B Testing, Regression Analysis, Probability

Data Analysis and Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, DAX, Tableau, Excel

NLP and LLM: NLP, Text Classification, Sentiment Analysis, LLM, RAG, Embeddings, Vector Databases, Hugging Face Transformers, NLTK, spaCy

Databases, Cloud, and DevOps: MySQL, NoSQL, FastAPI, REST APIs, AWS, Microsoft Azure, Docker, Linux, Git, GitHub

Data Operations: ETL, Data Wrangling, Data Pipelines, Business Intelligence, Agile

EDUCATION

Acropolis Institute of Technology and Research | 2018–2022

Bachelor of Technology (B.Tech), Computer Science | CGPA: 8.2

CERTIFICATIONS

Google Data Analytics Professional Certificate | Coursera | November 2024

Training in data cleaning, analysis, and visualization using Google Sheets, SQL, Tableau, and R.
